Wharton Interactive Crash Course: Practical AI for Instructors and Students

<https://www.youtube.com/playlist?list=PL0EdWFC9ZZrUAirFa2amE4Hg05KqCWhoq>

*In this five-part course, Wharton Interactive's Faculty Director Ethan Mollick and Director of Pedagogy Lilach Mollick provide an overview of AI large language models for educators and students. They take a practical approach and explore how the models work, and how to work effectively with each model, weaving in your own expertise. They also show how to use AI to make teaching easier and more effective, with example prompts and guidelines, as well as how students can use AI to improve their learning.*

## **Suggested Reading:**

[libraries.VSC.edu](#) – Individual Databases tab, find O'Reilly for Higher Education in search box list, click Go

[ChatGPT for Dummies](#) by Pam Baker – focus on Chapter 7: Working with ChatGPT in Education, but whole text is good.

[Prompt Engineering for Generative AI](#) by James Phoenix and Mike Taylor – focus on Chapters 1 and 2.
